SUMMARY

Product leader with 5+ years in product management, from PM to CPO. Builds consumer and AI agent products hands-on, works backwards from customer problems and separates real AI value from hype.

SKILLS

Product: Consumer Products, Personalization, Product Discovery, User Research, A/B Testing, KPI Ownership, Product Strategy, Roadmapping, Stakeholder Management, E-Commerce, Scrum

AI and Technical: AI Agents, Agentic Experiences, AI Prototyping (Claude, Cursor), Automation (n8n), REST APIs

Quality and Analytics: Test Strategy, Test Planning, Bug Tracking, Test Automation, Firebase Analytics, Power BI

Tools: Jira, Confluence, Figma, Miro, Notion, Trello, Slack, n8n, Supabase, App Store Connect, Meta Ads Manager

Languages: Azerbaijani (Native), Turkish (Native), Russian (B2), English (B2), German (B1)

EXPERIENCE

Co-Founder and Product Lead, Testavi – Berlin — Oct 2025 – Present

- Co-founded an AI QA platform where visual AI agents test web app user flows from plain-English instructions
- Researched AI testing use cases and analyzed competitors (Playwright, Cypress, QA Wolf) for positioning
- Defined core AI agent features: action reasoning, outcome validation, video replays and SSO login
- Integrated test results into customer workflows through APIs for Slack, Jira, CI/CD and email
- Ran A/B tests to validate feature and messaging decisions

NetTech LLC – Web and Mobile App Development Agency, Baku, Azerbaijan — Apr 2020 – Nov 2025

Chief Product Officer (Remote) — *July 2023 – Nov 2025*

Product Owner — *Oct 2021 – July 2023*

Product Manager — *Apr 2020 – Oct 2021*

- Owned the product roadmap for client web and mobile products at a 51–200 person agency
- Led the product team as CPO, defining product strategy, KPIs and priorities across the company portfolio
- Managed the Jira backlog in Scrum and worked with design, engineering and QA on mobile and web releases

Product Owner, iboxapp – E-Commerce Platform (NetTech project) — Jan 2021 – May 2022

- Ran user research and product discovery with users and stakeholders, turning findings into user stories
- Defined the product roadmap and prioritized the backlog and releases in Jira using Scrum
- Analyzed product and user data in Power BI and ran A/B tests to guide roadmap decisions

QA Team Lead and Product Manager, Buglance – Azerbaijan — July 2019 – July 2020

- Led product and QA work for a crowdsourced testing platform with 100K+ testers worldwide
- Led the QA team for web and mobile apps, building test strategies, test plans and test automation
- Introduced structured bug tracking that improved release quality, and mentored junior QA testers

QA Tester, Buglance and Competo LLC – Azerbaijan — Jan 2017 – June 2019

- Wrote and executed test cases for 200+ client projects across web and mobile apps

PROJECTS

Movestart – Founder and Product Builder, Mobile Fitness App — Aug 2026 – Present

- Built and launched a free fitness app on the App Store with AI-assisted development; Android coming soon
- Built AI personalization: an AI chat coach and a personalized 30-day workout plan for each new user
- Developed a live workout meetup feature for group training in any city, with a Berlin rollout planned
- Reached 120+ organic downloads through social media posts, with no paid advertising

EDUCATION

Bachelor of Management, National Academy of Statistics, Accounting and Audit – Kyiv, Ukraine — Expected 2028

Distance learning program
